

# Together, we can reduce the harm of COVID-19

How has COVID impacted you and **your family**?

Do you have **questions around vaccines** that you want to explore in a **safe space**?

Do you want to **build a community** with others who have had similar struggles?

**We want to invite you** to explore the impact that COVID-19 has had on you, your family, and your community through photography and storytelling. Through this project, we will discuss ways in which we can all work together to vaccinate our communities to keep everyone safer and stronger.

## What you will get from this project:

- Tell your story and share your experiences with COVID
- Connect with your community
- Learn photography & graphic design skills

The project will consist of **four to five FREE two-hour workshops** beginning in **March 2022**. All participants will also receive a \$250 stipend for travel and childcare.

Call **530-276-8274** for more information.
